

Experiment & Engage at School Age STEAM at APL

Appleton Public Library

What is School Age STEAM

School Age STEAM is a drop in exploratory program for school age kiddos and their families. This summer, we explored the properties of air and gas, bees and bugs, and so much more!

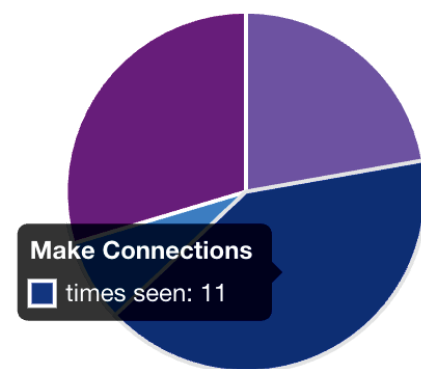

The activities invite families to try and try again, make connections to their world and to each other, learn through doing, and take risks.

Connect with your kiddo!

Did you attend a School Age STEAM program? Here are some questions you can ask at home!

- What did you already know about _____ before you went?
- Did you discover any new knowledge?
- If you could pick one activity to do again, what would it be?
- Look at a photo together - Tell me what you were doing here?
- Did you notice what any of the other kids and families were doing?

What we notice during SA-STEAM

- Making Connections
- Learning Through Doing
- Social Emotional
- Taking Risks

Appleton staff frequently observe programs to see how kids are learning and what outcomes are coming from our programming!

Snapshots from Birds & Bugs!

Taking risks - Exercising patience for finished product. The Bee Hotels were a lengthy process.

Learning through doing - watching her brother make a worm before attempting her own

Literacy Connection
